

# TS12 Heat Sealer

**Lako Tool** is proud to announce the **TS12 Heat Sealer**. The **TS12** is a precision heat sealer designed to produce heated crimp seals for flexible packaging materials.

The digitally controlled heat sealer allows independent upper and lower seal jaw temperature and accurately controls the temperature across the entire length of seal.

The seal pressure is changed by simply adjusting the cylinder input PSI. The TS12 insures sealing consistency for each sample and allows for seal testing, sample package development or small production sealing.

## TS12 Heat Sealer Standard Features

- Digitally controlled temperature
- Digitally controlled dwell time
- Independent upper and lower sealing temperatures
- Footswitch
- Safety guards and switches for safe operation
- Maintenance hardware
- Film Tray

## TS12 Heat Sealer Optional Features

- Quick-Change Seal Jaw Inserts with any seal pattern up to 12" long. (The Quick-Change Seal Jaw Inserts allow the operator to change the sealing pattern in a matter of minutes without having to change heaters or wiring)
- Many insert materials and coatings are available
- Phenolic seal jaw tray
- On site training
